

Time to check Private Applicators Licenses

Many of our farmers hold Virginia Private Applicators Pesticide licenses so that they can purchase and apply restricted herbicides.

Please check the expiration date on your current license! Our files indicate that many of those licenses will expire on Dec. 31, 2009.

If you have completed a recertification course and have renewed your license, please notify us so that our files can be updated. Then, you will be ready to go in the spring.

If you have not completed a recertification course, please do so this fall. Once you have renewed your license, please contact us with your new expiration date.

By getting things up to date now, it will save you valuable time during the busy spring planting season!
