

Hydrated Lime

GUARANTEED DRY WEIGHT ANALYSIS:

Total Calcium (Ca)	34.20%
Total Magnesium (Mg)	20.40%
Minimum Calcium Oxide	46.50%
Minimum Magnesium Oxide	32.00%
Calcium Carbonate Equivalent (CCE) . .	131.70%
Effective Neutralizing Value (ENV) . . .	129.52%
Derived from ground limestone.	

FINENESS:

Minimum passing 20 mesh sieve	100.00%
Minimum passing 60 mesh sieve	100.00%
Minimum passing 70 mesh sieve	100.00%
Minimum passing 100 mesh sieve	99.80%
Minimum passing 200 mesh sieve	97.00%
Minimum passing 325 mesh sieve	92.00%

Meets WV fineness classification for pulverized.
Maximum moisture content less than 1%.

1,400 lbs. of this product equals one ton of standard liming material.

DIRECTIONS FOR USE

Gardens: Bonide's Hydrated Lime can be applied anytime during the growing season. Test soil pH level. Use the results of your soil test to determine how much you wish to change the pH level of your soil. A soil pH level of 6.5 is best for most gardens. Generally, 3.5 lbs. of Hydrated Lime per 70 sq. ft. will raise the pH unit measure one point on the pH scale. Wearing gardening gloves, work in Bonide's Hydrated Lime around each plant. Do not mix with fertilizers before using. Water normally.

Potted Plants: Once a year, mix one (1) tablespoon of Bonide's Hydrated Lime in one gallon of water and apply as you would normally water.

CAUTION: Harmful if swallowed. Do not inhale. Keep out of reach of children and pets. Prolonged contact with Hydrated Lime may cause irritation or burns to wet skin. In case of contact with eyes, flush thoroughly and call physician.

Hydrated Lime quickly raises soil pH (the measure of the degree of acidity or alkalinity of the soil). Adjusting the soil to the proper pH helps plants to grow and strengthen by making it easier for the plant roots to take up nutrients in the soil.

A pH of 6.5 to 7.0 is considered by many to be "neutral". However, each type of plant has a soil pH that is right for that plant. A soil pH range of 5.8 to 7.0 is considered suitable for most garden crops and lawns. A soil test should be performed prior to using Hydrated Lime to establish the correct amount to use.

FOLLOW DIRECTIONS CAREFULLY.

Timing and method of application, weather and crop conditions, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the manufacturer. Buyer assumes all risks of use, storage and handling of this product.

Store in a dry place.

MANUFACTURER'S STATEMENT:

This product conforms to the Guaranteed Analysis on the label. Manufacturer's directions regarding use of this product are based upon tests believed to be reliable. All statements made concerning this product apply only when used as directed under normal use conditions. This product is sold as is. Manufacturer makes no warranties, express or implied. In no event shall manufacturer be liable for special, indirect, incidental or consequential damages of any kind.

CAUTION: Keep this product out of the reach of children. Keep from contact with eyes, cuts or sores. Wash hands after use. Not for human consumption.

NOTE: This product is sold by weight, not volume. Settling may occur during shipment.
