3.4% Water Insoluble Nitrogen*		Bacillus pumilus	208 CFU per gram
Soluble Potash (K ₂ O)	5%		
Sulfur (S)	2%		
Iron (Fe)	1%		

Derived from: Sulfate, Urea, Sulfate of Potash, Ferric Oxide & Elemental Sulfur.

*Contains 7.70% Slow Release Nitrogen from Pasteurized Poultry Manure & Methylene Urea, Amonium Sulfate and Urea.

Where to Use

For use on all lawns: Cool season grasses including bluegrass, fine fescue, tall fescue and perennial ryegrass. Warm season grasses including bentgrass, bermudagrass, St. Augustine grass, zoysiagrass, and centipede grass.

When to Use

Feed any time grass is actively growing.

- Cool season grass: Feed 3-4 times each year: Early Spring, Late Spring (optional), Early Fall and Late Fall.
- Warm season grass: Feed 4-5 times each year: Late Winter, Early Spring, Late Spring, Late Summer, and Fall.

Can be used on established lawns as well as new seed / sod installations. When applied at the recommended rates of application, this product will not burn grass and is appropriate for areas frequented by children & pets

Application Rate

Established Lawns: Feed at a rate of 3.3 lbs. per 1,000 sq. ft.

New Lawns / Overseeding: Feed at a rate of 4 lbs. per 1,000 sq. ft.

Seed can be sown on the same day of application.

Sodding: Apply to the finished grade soil prior to installation at a rate of 4 lbs. per 1,000 sq. ft.

How to Use

Apply to a dry lawn that has recently been mowed. Use a drop or broadcast spreader and be certain to overlap slightly to prevent striping. For best results water lightly after the application if rain is not expected within 24 hours.
