TRUST PURINA® BECAUSE THE NUTRITION AND QUALITY OF WHAT
YOUR BIRDS EAT AFFECTS THEIR HEALTH

RESEARCH

We perform feeding trials with our recipes and popular backyard breeds because we know that their nutritional needs are different. Our experts study ways to optimize the overall health of backyard poultry – getting them off to a great start and supporting healthy growth to produce a beautifully feathered, sustainable flock.

QUALITY

Performance is determined by what the bird eats. That is why we formulate with the highest possible quality ingredients and design food backed by thousands of research studies. Our industry-leading quality control standards and unparalleled research programs deliver high- quality nutrition to your family.

Calcium (Ca) (Max)	1.30%		

YOUR BIRDS & YOUR FAMILY DESERVE THE OPTIMUM NUTRITION IN PURINA[®] PREMIUM POULTRY FEED

Purina rejects thousands of tons of ingredients every year that don't meet our strict nutritional and quality standards as defined by our industry-leading FeedGuard[®] Nutrition System. Ingredients are analyzed using infrared reflectance technology to ensure proper nutrient levels. If they don't measure up, they don't go in our feed. Feeds are formulated without added hormones, animal proteins and animal fats. From the fields in North America to your home, you have our promise that this feed will provide optimum nutrition to your home-raised, free-range and heritage birds.
