

Directions for Use:
Directly approaching your horse with the Fly Mask may startle him.

We recommend:

1. Start by putting a rope around horse's neck and removing halter. Open straps on mask.
2. Approach horse from left side and gently move mask from neck up left side of horse's head.
3. Cover horse's left eye with your hand then fit mask over the ears.
4. Pull main section of mask down over horse's face and secure straps under jawl.
5. Adjust for snug, yet comfortable fit with room for eyes. Straps can be trimmed with scissors for custom fit.

CAUTION: VISION MAY BE IMPAIRED DURING RAINSTORMS.

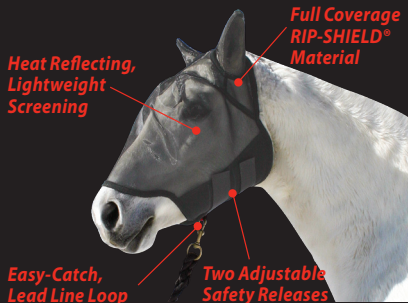

The Horse World's Most Trusted Name®

UltraShield® EX Fly Mask has superior, more durable protection from bugs and sun. Rip-Shield®, the most technically advanced tear-resistant material is highly durable, lightweight and provides for optimum visibility.

100% Money-Back Guarantee: If you are not satisfied with the quality of this or any Absorbine product, we will refund your money. The durable construction of our UltraShield EX Fly Mask is guaranteed for one year against defects in material and workmanship.

For Best Results: Be sure to check your horse's face and eyes daily and periodically wash your Fly Mask. The Fly Mask may be machine washed and line dried. The two adjustable safety releases can be trimmed with scissors to allow for individual adjustments. After catching your horse and attaching the lead line to our catch loop, lead the horse back to the tie post and put on halter. Do not leave horse tied with just the Fly Mask catch loop.
